

New Haven's Student Government Institutes Recycling Program

New Haven's Student Government instituted a Recycling Program campus wide, which began in April 2008. Environmental Club Founder and President, Julia Liebster, issued the following statement: "New Haven School has been, for some time now, trying to become more 'green'. I have been actively working to start a recycling program at New Haven. With incredible amounts of support and information from Karl Jarvis, our Science Teacher, our recycling program with Waste Management is now beginning. We greatly look forward to seeing the large amounts of trash we produce everyday turned into something useful!"
